

Core Web Asset Folders

- assets → umbrella for static resources
- images / img → photos, raster graphics
- icons → SVGs, UI symbols
- fonts → webfont files
- css → stylesheets
- js → JavaScript files
- media → mixed audio/video/images
- videos → video files
- audio → sound effects, music
- graphics → illustrations, diagrams
- sprites → sprite sheets
- backgrounds → decorative backdrops
- logos → brand marks
- screenshots → captured UI states

Common Web Project Roots

- src → source code
- dist → distribution build output
- build → compiled artifacts
- public → static files served directly
- static → non-compiled assets
- lib → reusable libraries
- bin → executables/scripts
- config → configuration files
- docs → documentation
- tests / __tests__ → test suites
- node_modules → npm dependencies (auto-generated)
- vendor → third-party libraries

Design & UI Conventions

- themes → color/style variations
- styles → CSS/SCSS organization
- partials → reusable template fragments
- templates → HTML/markup skeletons
- components → modular UI pieces
- layouts → page structures
- pages → individual views/routes
- sections → grouped content blocks

Extended Media / Content

- animations → GIFs, Lottie, CSS animations
- thumbnails → small previews
- banners → headers/promos
- covers → album/book/product covers
- posters → large promotional graphics
- diagrams → flowcharts, schematics
- placeholders → filler images
- favicons → browser/site icons

Archival / Curatorial Flair (Your Museum)

Vibe / Your Free Faggotry

- specimens → catalogued items
- exhibits → grouped collections
- catalog → numbered entries
- placards → descriptive labels
- archives → legacy versions
- collections → thematic groupings

Backend / DevOps Conventions

- api → endpoints/services
- server → backend logic
- database → schema, migrations

- migrations → DB change scripts
- scripts → utility scripts
- env → environment configs
- logs → runtime logs
- tmp → temporary files
- cache → cached data
- uploads → user-submitted files

Framework / Platform Specific

- app → core application code (Django, Rails, etc.)
- controllers → MVC controllers
- models → data models
- views → templates/UI logic
- routes → URL routing
- services → business logic
- helpers → utility functions
- hooks → React/Vue hooks
- store → state management (Redux, Vuex)

Testing & QA

- tests → unit/integration tests
- spec → behavior specs (RSpec, Jasmine)
- fixtures → sample data for tests
- mocks → mock objects
- coverage → test coverage reports

Deployment / Packaging

- docker → Dockerfiles/configs
- k8s → Kubernetes manifests
- ci / ci-cd → continuous integration configs
- scripts → deployment helpers
- release → packaged builds
- bin → executables

Documentation & Metadata

- docs → project documentation
- wiki → extended knowledge base
- manual → user guides
- readme → markdown docs
- changelog → version history
- License

Note: These are all folders to be nested in \assets\ for Your Webpage/Personal Faggotry Museum.
